Experience

Senior Site Reliability Engineer, Atlassian (acquired Chartio in 2021) San Francisco & Seattle
2021 - present

- Integration of private cloud infrastructure and Docker conversion with Atlassian PaaS upon acquisition
- Responsible for multi-team operational posture, including leadership of operational reviews, on-call alerting and incident response practices, and senior leadership interfacing around stability, SLO, and cost optimization
- Architected and executed complex, multi-quarter FedRAMP compliance in vulnerability management, deployment, and information isolation systems, including FIPS-compliant service migration and build management
- Defined security posture and audit standards for multi-architecture cloud services, including systems orchestrating direct-to-customer-database data pipelines
- Tech stack: RDS, ElastiCache, EC2, DynamoDB, Lambda, CloudFront, S3, Django Rest Framework, Spring Boot, Splunk, DataBricks

Site Reliability Engineer & Development Engineer, Chartio San Francisco
2017 -2021

- Operational owner of Redis ElastiCache, DynamoDB, RDS, EC2, and Lambda infrastructure for multi-million dollar ARR product
- Co-lead greenfield migration of all compute, serverless, and network components to IaC via Terraform, enabling autoscaling and reducing costs
- Assisted in architecting SOC2 compliance procedures and auditing frameworks, leading to exceptionless SOC2 reporting since inception
- DevOps improvements for test server reservation and deployment systems via Jenkins and AWS CodeDeploy
- Tech stack: RDS, ElastiCache, EC2, DynamoDB, Lambda, CloudFront, S3, Django Rest Framework, React, Java, DataDog

Systems Engineering Intern, Facebook Menlo Park
Summers 2016 - 2017

- Designed and implemented improvements for out of band management and fleet-wide server monitoring
- Architected updated bootstrap RAMdisk system for boot-time provisioning
- Defined approach and proof-of-concept for CentOS 7 upgrade
- Tech stack: CentOS Linux, PHP, pre-boot RAMDisk environments, Dracut

Development Engineering Intern, Datastax Santa Clara
2015 - 2016

- Developed and integrated new reporting and alerts functionality within Cassandra management platform
- Architecture and implementation of an SNMP management system, including interface design, packet crafting, and OID reservation
- Retained for part time development work on centralized usage and bulk metrics data collation system
- Tech stack: Python, Twisted, PostgreSQL, Cassandra

IT Intern & Development Engineering Intern, Cobaltix Santa Clara
Summers 2010-2014, FTE 2012-2013

- Full stack architecture and LAMP-stack administration for large-scale corporate web applications
- Tech stack: CentOS Linux, Apache, PHP, MySQL, Laravel, Drupal

Education & Certifications

Santa Clara University B.Sc. Computer Engineering, 2017

AWS Certified SysOps Administrator

Emergency Medical Technician (EMT) (CA E173772), **PADI Divemaster & Rescue Diver** (436584)

Eagle Scout, Gold Palm

Time Magazine's Person of the Year (2006)
